Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A light-emitting ~~device~~ device, comprising:

a light-emitting layer; and

an electrode layer, ~~wherein film~~ a film thickness of the electrode layer ~~is~~ being set so that light extracted from the light-emitting device out of light emitted in the light-emitting layer has a predetermined chromaticity value.

2. (Currently Amended) A light-emitting ~~device~~ device, comprising:

a substrate;

a light-emitting layer disposed above the substrate;

an electrode layer disposed above the light-emitting layer; and

a material layer disposed above the electrode layer to cover the light-emitting ~~layer,~~ layer;

~~wherein film~~ a film thickness ~~is~~ being set so that light extracted through at least the material layer out of light emitted in the light-emitting layer has a predetermined chromaticity value.

3. (Currently Amended) A light-emitting ~~device~~ device, comprising:

a substrate;

a light-emitting layer disposed above the substrate; and

an electrode layer disposed above the light-emitting ~~layer,~~layer;

~~wherein film~~ a film thickness ~~is~~ being set so that light extracted through at least the substrate out of light emitted in the light-emitting layer has a predetermined chromaticity value.

4. (Currently Amended) An organic EL ~~device~~ device, comprising:

a substrate;

an organic EL layer disposed above the substrate;

an electrode layer disposed above the organic EL layer; and

a material layer disposed above the electrode layer to cover the organic EL ~~layer,~~ layer;

~~wherein~~ film thicknesses ~~are~~ being set so that light extracted through at least the material layers out of light emitted in the organic EL layers has a predetermined chromaticity value.

5. (Currently Amended) An organic EL ~~device~~ device, comprising:

a substrate;

an organic EL layer disposed above the substrate; and

an electrode layer disposed above the organic EL ~~layer,~~layer;

~~wherein film~~ a film thickness ~~is~~ being set so that light extracted through at least the substrate out of light emitted in the organic EL layer has a predetermined chromaticity value.

6. (Currently Amended) The light-emitting device according to Claim 1,

~~wherein~~ the light-emitting layer ~~comprises~~ including three types of light-emitting layer corresponding to the three colors red, green, and blue, and

~~wherein~~ the film thicknesses of the electrode layers ~~are~~ being individually set corresponding to the regions on which light from the three types of light-emitting layers is incident.

7. (Currently Amended) The light-emitting device according to Claim 1,

~~wherein~~ the electrode layer ~~comprise~~ including a plurality of laminated layers, and

~~wherein~~ the film thickness of at least one of the plurality of layers ~~is~~ being set.

8. (Currently Amended) The light-emitting device according to Claim 7,

~~wherein~~ the plurality of layers ~~comprise~~ including transparent layers ~~for transmitting~~ to transmit the light from the light-emitting layers and reflective layers ~~for reflecting~~ to reflect the light, and

~~wherein~~ the film thicknesses of the transparent layers ~~are~~ being set.

9. (Currently Amended) An electronic ~~apparatus comprising~~ apparatus, comprising:

_____ the light-emitting device according to Claim 1.

10. (Currently Amended) A method of manufacturing a light-emitting device, ~~comprising the steps of:~~comprising:

disposing a light-emitting layer above a substrate;

disposing an electrode layer above the light-emitting layer; and

disposing a material layer above the electrode layer to cover the light-emitting ~~layer,~~layer;

~~wherein~~ film thickness of the electrode layer ~~is~~ being set so that light extracted through at least the material layer out of light emitted in the light-emitting layer has a predetermined chromaticity value.

11. (Currently Amended) A method of manufacturing a light-emitting device, ~~comprising the steps of:~~ comprising:

disposing a light-emitting layer above a substrate; and

disposing an electrode layer above the light-emitting layer, ~~wherein film~~ a film thickness of the electrode layer ~~is~~ being set so that light extracted through at least the substrate out of light emitted in the light-emitting layer has a predetermined chromaticity value.

12. (Currently Amended) The method of manufacturing a light-emitting device according to Claim 10,

~~wherein~~ the light-emitting layer ~~comprises~~ including three types of light-emitting layers corresponding to the three colors red, green, and blue, and

~~wherein~~ the film thicknesses of the electrode layers ~~are~~ being individually set corresponding to the regions on which light from the three types of light-emitting layers is incident.

13. (Currently Amended) The method of manufacturing a light-emitting device according to Claim 12,

~~wherein~~ the three types of light-emitting layers ~~are~~ being disposed by using ~~a mask~~ mask vapor ~~deposition method.~~deposition.
